Introduction

State of the State – A Statistical Profile of Rhode Island's Cities and Towns

From Burrillville to Block Island, from Woonsocket to Westerly, recent demographic and employment trends have impacted the lives of all Rhode Islanders. Incorporating information collected by the United States Department of Commerce and the Rhode Island Department of Labor and Training, **State of the State** depicts demographic changes and recent employment trends that have impacted our local economies over the last twenty years.

Population diversity based on age, sex, race, and ethnicity, as well as educational attainment, labor force statistics, and English language proficiency of local residents, is encapsulated in statistical profiles for each of Rhode Island's thirty-nine communities. An overview of local private sector employment by industry sector is also provided on a city and town basis.

Overview

Rhode Island had reached peak private employment levels in 2006 with an average of 417,700 private sector jobs. The annual average unemployment rate for the year was 4.9 percent and the state's population stood at 1,060,196.

Rhode Island's economic momentum began to change the following year, and the state entered into a recessionary period months earlier than the official National Recession. By 2009, the height of the recession in Rhode Island, the number of private jobs averaged 387,800, the annual average unemployment rate was 11.0 percent, and the state's population had shrank to 1,053,209 residents.

Since the end of the recession, Rhode Island has been gradually recovering. As of 2018, private job levels averaged 421,500, an increase of 33,700 (+8.7%) from the 2009 average and is now the peak private employment level. The unemployment rate is down 6.9 percentage points from 2009 to 4.1 percent. The state's population has yet to regain residents lost during the recession, as the count stood at 1,057,315 in 2018, down 2,881 (-0.3%) from 2006. On a positive note, the population in 2018 increased over 2017 by 829 (+0.1%) residents, the second consecutive over-the-year increase in population.

Other Findings

- Twenty-six of the state's thirty-nine cities and towns reported total employment growth between 2018-2019, with Tiverton having the largest over-the-year increase (+13.4%). Hopkinton (-13.6%) posted the largest total employment decrease.
- Providence establishments employed the largest percentage (23.3%) of Rhode Island private sector workers, followed by Warwick (10.6%), Cranston (7.3%), East Providence (4.9%) and Pawtucket (4.7%).
- Rhode Island total annual average employment in 2018 (481,683) was the highest employment level on record.
- The state experienced a 0.1 percent population increase between the 2017 and 2018 population estimate. Twenty-three cities and towns gained residents, with Cranston (+240), Cumberland (+197) and Pawtucket (+182) adding the most people. Of the sixteen cities and towns that lost residents, only South Kingstown (-176) and Providence (-168) lost more than 150 residents.
- Rhode Island (4.1%) was tied for the 16th highest annual average unemployment rate in the country in 2018. Alaska (6.6%), District of Columbia (5.6%) and West Virginia (5.3%) had the highest rates in the country. The annual average unemployment rate for the United States as a whole in 2018 was 3.9 percent.
