

Labor Supply & Demand

First Quarter 2020

Unemployment Insurance (UI) claimants represent an able and available supply of trained workers who are currently seeking work. Online postings represent a current demand for labor detailing the types of occupations employers are seeking to fill.

On March 31, 2020, the Department of Labor and Training's EmployRI online network recorded 11,548 online job postings. As of the week ending March 14th, 10,856 RI residents collected unemployment insurance benefits accounting for 39 percent of the state's total unemployed.

The share of job postings for which the usual educational requirement was either a bachelor's or an associate degree was 26 percent. Claimants with those degrees represented just 13 percent of the total collecting. The share of job postings for which the usual education requirement was a high school degree or lower was 42 percent, while the number of claimants with that level of education represented 57 percent of the total collecting.

The table to the right suggests that employers seeking to fill vacancies in the occupational groups near the top of the table should have an easier time finding experienced workers than those employers who are looking to employ experienced workers in occupational groups found near the bottom of the table.

Construction & Extraction Occupations

The greatest labor surplus was associated with the Construction & Extraction group for which there were sixteen UI claimants with this type of work experience for every online construction & extraction occupation posting.

Labor shortages are most likely to be found in the Healthcare Practitioners & Technical and the Architecture & Engineering groups, where postings outnumber claimants by more than 10 to 1.

This reference period predates the pandemic related closings in RI.

Labor Supply & Demand by Major Occupation

	Postings*	Claimants**	Claimants/ Postings
Construction & Extraction	99	1,579	16.0

Labor Surplus

The 10,856 UI claimants reported previous work experience in more than 600 different occupations.

Labor surpluses existed for 27 of the 40 occupations most frequently cited by UI claimants.

Job seekers looking for employment in the occupations listed on the adjacent table may have a challenging time finding employment in the current environment.

Some surpluses exist due to school vacations, holidays, or seasonal factors; this type of surplus is typically short lived.

Labor Shortage

Occupations with the Most Postings per Claimant

During the quarter, EmployRI recorded 11,548 postings for more than 400 different occupations. The number of postings exceed the number of unemployed workers for 191 occupations, indicating a possible labor shortage for those occupations.

Employers looking for workers in the occupations listed on the adjacent table may have a challenging time finding experienced workers in the current environment.

Occupational Title	Postings*	Claimants**	Postings per Claimant	Educational Requirement
Speech-Language Pathologists	75		75.0	Master's

^{*} Jobs posted during the 90 day period ending March 31, 2020 and still open on March 31, 2020.

EmployRI aggregates postings for a variety of job boards. Software is in place that is designed to eliminate duplicate postings.

Claimants select the occupational code which best describes their current position upon registering for benefits.

^{**} Individuals receiving unemployment insurance payments for the week ending March 14, 2020.
